About Us

Who Are We?

Neo Developer League is a student led organization that hosts competitive programming events created to **inspire**. Given a prompt, teams of 10 high school students in the same school must collaborate to create solutions to shape our future. **We are NOT a hackathon though we share many similarities.**

October 26 2024: We hosted the WRDSB Dev Summit in **Waterloo**.
Our next event, the 6ix summit is planned to be held in **Toronto**.

Our Goal

We aim to redefine the world of programming competitions.

Our mission is to create an inclusive and inspiring environment where young programmers can learn and develop in an atmosphere that resembles the greatest sporting events. By offering diverse challenges, we aim to pave the pathway for rising visionaries to shape our future.

Let's do it together.

Why Sponsor Us?

Imagine an event where innovation leads the way, where young programmers can dive into competitions unlike any seen before.

Imagine the energy and creativity from schools combining in pursuit for glory.

Imagine stepping into the spotlight as it shines down on you.

Imagine the passionate audience cheering as you present your idea.

*By sponsoring **us**, you are sponsoring the **next generation of innovators.***
